HAPPY NEW YEAR

LOWER YOUR BILL AS TEMPERATURES DROP

Natural gas is the most affordable way to keep your home warm this winter. Homes using natural gas spend 43 percent less than homes using electric.*

Save even more with these tips:

Set your thermostat as low as comfortable for your family while you're awake.

Apply weatherstripping or caulk on windows and doors to prevent drafts.

Lower the temperature on your water heater to the warm setting (120 degrees)

For more savings tips, visit PGWorks.com or follow @MyPGW on social media.

* Based on national average for winter heating costs by U.S. Energy Department.

IMPORTANT CO SAFETY INFO

Carbon monoxide (CO) can be produced by home appliances and other fuel-burning equipment. CO is a colorless, odorless, and potentially dangerous gas that can cause sickness – even death.

To protect your family:

- ▶ Have all your fuel-burning appliances serviced regularly by a qualified technician.
- ▶ Have a CO detector/alarm installed, if you don't already have one, and test it twice a year.
- ▶ Never use an oven to heat your home.

If you suspect CO poisoning,
CALL 911.
